The LSE Summer School

The LSE Summer School, established in 1989, is a nine-week programme which runs between June and August. The programme consists of three three-week sessions, and offers over 40 courses in Accounting, Economics, Finance, Law, Business and Management, Research Methods, Data Science & Mathematics and International Relations, Government & Society.

LSE enjoys a highly international student body and this is reflected on the Summer School with students drawn from over one hundred and ten countries.

The objective of the programme is to provide intensive courses at university level, taught by leading LSE faculty. Many of the courses taught during the Summer School are based on regular LSE undergraduate courses taught by the same academics who teach on the degree programmes. Courses are attended by both students and professionals.

Each course is intensive, offering at least 54 hours of contact time. This usually consists of 36 hours of lectures and 18 hours of classes/seminars. The standard format for Summer School courses is to have a midsession assessment and a final examination. The final exam papers are assessed by external examiners from other British universities (a selection of highest, lowest/fail and middle range papers). An examination grade profile is shown below for reference.
